GUEST MEDIA KIT / PODCASTS, DEBATES, PANELS, EVENTS

Dr. Greg Newkirk

Molecular biologist and science communicator / Host, The Dr Greg Show

I debate health and biotech misinformation live, nightly, with the primary research on screen.

I spent 17 years at the lab bench before starting The Dr Greg Show. Most nights I am across the table from someone who disagrees with me about genetics, evolution or vaccines. I take the claims one at a time, and I keep it civil.

Ph.D., Microbiology, UC Riverside (2023)
Published in *Nature Nanotechnology*, *ACS Nano*

17 years at BASF, Cibus, UC San Diego
NDSEG Fellow; co-inventor, U.S. Patent 11,186,845

500+
live debates

1,000+
hours live on air

Live nightly at 9 PM PT on YouTube, TikTok, Twitch and Facebook as @drgregshow. Cross-platform totals, rounded down.

READY-TO-BOOK TOPICS

What does the vaccine evidence actually say?

Proposition: For routine childhood vaccines, the measured benefits far outweigh the measured risks.

Adverse-event reports, safety studies and mRNA myths, checked against the primary sources live.

Are viruses real? Germ theory vs. terrain theory

Proposition: Viruses exist and cause infectious disease.

Isolation, sequencing, electron microscopy and what "terrain theory" gets wrong.

Do humans share ancestors with other apes?

Proposition: Genetic evidence shows humans and chimpanzees share a common ancestor.

Chromosome 2 fusion, shared viral insertions and broken genes in the same places.

Climate change

Proposition: Human activity is the main driver of current global warming.

The measurements behind the consensus, and where biotechnology fits in mitigation.

A COVID retrospective

Lab leak, the pandemic's conspiracy theories, and what the evidence does and does not show.

Also: origin of life, gene editing, nanotechnology

Prebiotic chemistry from the molecular biology side, what CRISPR can and cannot do, and my own research on nanomaterial DNA delivery.

DEBATE AND GUEST RECORD

Kent Hovind, creation vs. evolution / Modern-Day Debate, Mar 2026

2v2: Adam and Eve vs. evolution, vs. Standing For Truth (Donny Budinsky) / Modern-Day Debate, Aug 11, 2026

Evolution on Trial, vs. MadebyJimbob / Modern-Day Debate, Jan 2026

Skeptics in the Pub Online, invited talk / Aug 27, 2026

Alex Stein vs 10 Skeptics, evolution round / Digital Social Hour (1.2M+ YouTube subscribers), Sept 2026

Next: Jake Lang vs 10 / Digital Social Hour, Oct 30, 2026

Next: Kent Hovind, in person / Digital Social Hour, Jan 4, 2027

Next: Dr Greg vs 10 / Digital Social Hour, Feb 17, 2027

FORMATS AND SETUP

Formats: one-on-one or 2v2 debate, long-form interview, panel, live stream, audience Q&A, talk.
Remote: multi-camera studio, Electro-Voice RE20 broadcast mic. Riverside, Zencastr, Zoom, Meet or your platform.
Schedule: Pacific Time; any slot outside my 9 to 11 PM PT show. In person in San Diego County; travel by arrangement.

SAMPLE QUESTIONS FOR HOSTS

1. You spent 17 years in a lab. Why start arguing with strangers on the internet every night?
   How I moved from research to live science communication.
2. After 500+ live debates, what actually changes someone's mind?
   What I have seen work, and what backfires.
3. What happened when you debated Kent Hovind?
   Two hours with one of the best-known young-earth creationists.
4. What is the single strongest genetic evidence for common ancestry?
   Chromosome 2, explained without jargon.
5. Scientists don't know how life started. Isn't that a win for creationists?
   Why an open question is not the same as a gap for a designer.
6. How should a regular person check a viral health claim?
   A quick method for reading a study, or a claim about one.
7. Which question do you get asked that you still can't answer?
   Where the science is honestly unsettled.

BIOS FOR YOUR SHOW NOTES

SHORT BIO, 50 WORDS

I'm Dr. Greg Newkirk, a molecular biologist (Ph.D., Microbiology, UC Riverside) and host of The Dr Greg Show, a nightly live science program. After 17 years at the lab bench, I now argue science in public: more than 500 live debates, including creationist Kent Hovind on Modern-Day Debate.

LONG BIO, 150 WORDS

I'm Dr. Greg Newkirk, a molecular biologist and host of The Dr Greg Show, a live science program that streams nightly on YouTube, TikTok, Twitch and Facebook. I earned my Ph.D. in Microbiology at UC Riverside as an NDSEG Fellow and spent 17 years at the bench at BASF, Cibus and UC San Diego. My research has been published in Nature Nanotechnology and ACS Nano, and I am a co-inventor on a U.S. patent.

I started the show because misinformation spreads in live, unscripted conversations, and scientists are rarely part of them. Since August 2025 I have done more than 500 live debates and 1,000 hours on air, and the show has passed 6 million views. I have debated Kent Hovind and argued evolution in a 2v2 on Modern-Day Debate. My approach is simple: one claim at a time, with the primary source on screen.

WATCH BEFORE YOU BOOK

60-SECOND REEL
Demo reel
drgregshow.com/reel

DEBATE / 2 HR
Creation vs. evolution, vs. Kent Hovind
youtube.com/watch?v=EW4_KcJ-9Ak

2V2 DEBATE / 3 HR
Adam and Eve vs. evolution
youtube.com/watch?v=8FCbPhlGaYw

MODERATED DEBATE
Should we edit human DNA? vs. JF Gariepy
youtu.be/vHopBNX2pbc, from 9:39

MULTI-GUEST DEBATE
Vaccine evidence vs. eight challengers
youtu.be/Uw53ZEDVutE, from 9:12
